VOLUME 82

NUMBER 2 (147-402)

JUNE 2016

---

## **Contents**

|   |                |
|---|----------------|
| <i>Dedication</i>   | ... <i>iii</i> |
| <i>Preface</i>  | ... <i>v</i>   |
| <i>Research Papers</i>  |                |
| Parallel Partitioned Simulations of Real World's Coupled Problems<br><i>S Yoshimura and T Yamada</i>  | ... 147        |
| Robust Finite Element Approaches to Systemic Circulation Using the Locally Conservative Galerkin (LCG) Method<br><i>Hayder M Hasan and Perumal Nithiarasu</i>   | ... 163        |
| Multiscale Modeling of Failure in Composite Materials<br><i>Ramesh Talreja</i>  | ... 173        |
| St Venant Torsion and Bending of Prismatic Composite Shafts<br><i>Bhushan Lal Karihaloo and Qi-Zhi Xiao</i>   | ... 183        |
| Microstructure Evolution in Metal Nanostructures under Extreme Conditions of Temperature and Strain Rate<br><i>V Gupta, N M Ghoniem, R Crum, G Po, D Seif, S V Prikhodko, H A Colorado, B Ramirez and C Gámez</i> | ... 201        |
| Advanced Methodologies for Fracture Analysis and Damage Tolerant Evaluation<br><i>Nagesh R Iyer, G S Palani and A Ramachandra Murthy</i>  | ... 209        |
| Tuned Sloshing Damper in Response Control of Tall Building Structure<br><i>S K Bhattacharyya</i>  | ... 223        |
| Free Edge Effects in Sandwich Laminates Under Tension, Bending and Twisting Loads<br><i>N Dhanesh and Santosh Kapuria</i>   | ... 233        |
| Two-Temperature Continuum Model for Metal Plasticity<br><i>Shubhankar Roy Chowdhury and Debasish Roy</i>  | ... 247        |
| Physics Based Finite Element Interpolation Functions for Rotating Beams<br><i>Ranjan Ganguli</i>  | ... 257        |

---

|   |         |
|---|---------|
| Nonlinear Stability Characteristics of Composite Cylindrical Panel Subjected to Non-uniform In-plane Mechanical and Localized Thermal Loadings<br><i>Rajesh Kumar, L S Ramachandra and Biswanath Banerjee</i> | ... 271 |
| A Fast-Multipole Unified Technique for the Analysis of Potential Problems with the Boundary Element Methods<br><i>Ney Augusto Dumont and H lvio De Farias Costa Peixoto</i>                                   | ... 289 |
| Clean Water and Clean Energy Production: Simulation Using Finite Element Method<br><i>K N Seetharamu, K R Spandana and B Parikshit</i>  | ... 301 |
| Solidification with Buoyancy Induced Convection: Evaluation of Different Mushy Zone Formulations<br><i>Sudeep Verma and Anupam Dewan</i>  | ... 309 |
| Three-Dimensional Numerical Study of Conjugate Heat Transfer in Diverging Microchannel<br><i>V S Duryodhan, Abhimanyu Singh, S G Singh and Amit Agrawal</i>   | ... 321 |
| Bending and Buckling Analyses of Composite Laminates with and without Presence of Damage and its Passive Control with Optimized Piezoelectric Patch Location<br><i>Dipak Kumar Maiti and V M Sreehari</i>     | ... 329 |
| Scaling Laws of Rough Turbulent Flows from Turbulence Phenomenology: An Overview and a New Application<br><i>SK Zeeshan Ali and Subhasish Dey</i>   | ... 341 |
| Finite Element Analysis of Thin Circular Cylindrical Shells<br><i>Aruna Rawat, Vasant Matsagar and A K Nagpal</i>   | ... 349 |
| Numerical Studies of Piezoelectric Composites Using NURBS for Geometry and Field Functions<br><i>A V Singh and V Raj</i>  | ... 361 |
| Multi-Fidelity Design Optimization: Challenges in Complex Physics-based Computational Mechanics<br><i>Ramana V Grandhi</i>  | ... 369 |
| Finite Element Computations of Complex Flows<br><i>Sanjay Mittal, Gaurav Chopra, M Furquan, Navrose, V M K Kottedda and Varun Bhatt</i>   | ... 385 |
| <b>ACADEMY NEWS</b>   | ... 395 |
| Obituary  | ... 398 |
| Announcements   | ... 402 |
